

Book I

Table of contents

- Chapter 1: Introduction to biological modeling
- [Chapter 2: Biological dynamics and reaction kinetics](#)
- [Chapter 3: Emergent properties of small networks](#)
- Chapter 4: Molecular complexes and statistical mechanics
- Chapter 5: Computation: Formulation, simulation, and inference
- Chapter 6: Biological networks
- Chapter 7: Morphodynamics
- Chapter 8: Mitochondrial metabolism: A model
- Chapter 9: Integrative approaches in systems biology
- Appendix: Mathematical Foundations
